## PROJECTS

---

### EmoScan: Real-Time Sentiment Analysis Tool

- Developed a dashboard called EmoScan, a sentiment analysis tool that provides real-time insights into social media comments, classifying sentiment types instantly.
- Utilized python libraries to create a user-friendly interface for inputting comments and receiving sentiment classifications.
- Conducted thorough testing and validation to ensure accuracy and reliability of sentiment analysis results.

### Cricsphere: Turf & Tournament Management System

- Led development of a full-stack platform for cricket match scheduling, team coordination, and turf bookings using React, Spring Boot, and MongoDB.
- Integrated user/admin modules for registrations, scheduling, scoring, and real-time notifications with a responsive UI.
- Managed a developer team with Agile practices and collaborated with sports coordinators to refine features based on user feedback.

### **SmartPark:**

- I am currently working on a full stack development project that allows the users to select and book parking slots.
- My role is to take care of database, which is a NoSql database provided by firebase firestore.
